New DOPAG branch in Sweden

Manufacturer of metering and mixing technology expands presence in Northern Europe with own subsidiary

DOPAG continues to expand its global sales and service network by establishing a new subsidiary in Sweden. As of now, DOPAG Nordic will provide support to customers in Sweden, Denmark, Norway and Finland. The location was opened in Askim near Gothenburg. A team of industry experts with comprehensive technical expertise and many years of experience in the field of metering and mixing technology is now available to customers in Northern Europe.

"With our own branch office, we are closer to our customers," says Stefan Ström, Managing Director of DOPAG Nordic. Customers benefit above all from more personalized on-site advice and fast service when it comes to maintaining or repairing the metering and mixing systems and supplying spare parts.

"DOPAG provides all applications from one single source – from greasing and oiling to bonding and sealing up to potting and gasketing with FIPFG technology", says Walter Weterman, who runs the company together with Stefan Ström. "We are very delighted to offer these technologies now directly to customers in Northern Europe."

"Our goal is to be a valuable and long-term partner for our customers," says Sales Director Victoria Faugust.

Customers can reach DOPAG Nordic's homepage at www.dopag-nordic.com.

About DOPAG

We are one of the world's most experienced manufacturers of high-quality metering technology. Wherever adhesives, resins, silicones or lubricants are metered and applied in industrial production, we offer reliable, precise solutions. We provide systems and components for highly automated production processes, including for the automotive, wind, household appliances and electrical industries, as well as for aviation and space travel.

DOPAG is part of the HILGER & KERN GROUP, a reliable supplier, development and service partner to industrial companies in a variety of market segments for over 90 years. The group employs around 350 people and has subsidiaries and distributors in more than 40 countries.
