### **Individually configured dispensing systems for greasing and oiling DOPAG presents metering components and pumps at Lubricant Expo 2022 in Essen, Germany**

There are over 200 regular greasing and oiling applications involved in the production of a vehicle. These applications ensure smooth operation, reduced friction, durability and noise prevention. The requirements for these applications are different and constantly increasing. DOPAG has developed the lubriLine product line especially for the precise and highly automated processing of lubricants in the automotive industry. All components can be used modularly and integrated into fully automated production lines.

At the Lubricant Expo in Essen, Germany, customers can discuss directly with the DOPAG experts about solutions for greasing and oiling. The trade fair starts on 6 and ends on 8 September. The DOPAG stand is located in hall 7, stand number 737.

#### **Individual solutions from a single source**

With the lubriLine, DOPAG offers individual solutions from a single source. Thanks to the modular design, various system concepts can be implemented, both simple manual metering and complex, automated greasing systems. The product line includes various material supply systems as well as a wide range of metering and dispensing valves, for example for dispensing beads and small shots or for contactless shot and spray applications. DOPAG's metering control unit is ideally suited for complex dosing processes, whether in systems with a metering valve or into a 1K metering system with dispensing valves. For reliable process monitoring and reproducibility, various components for monitoring and control can be used, for example a light barrier, a gear flow meter or a pressure sensor.

DOPAG accompanies customers right from the start throughout the entire project, carries out tests in its own technical centre and works together with the customer to develop the solution that is precisely tailored to their requirements.

### **About DOPAG**

We are one of the world's most experienced manufacturers of high-quality metering technology. Wherever adhesives, resins, silicones or lubricants are metered and applied in industrial production, we offer reliable, precise solutions. We provide systems and components for highly automated production processes, including for the automotive, wind, household appliances and electrical industries, as well as for aviation and space travel.

DOPAG is part of the HILGER & KERN GROUP, a reliable supplier, development and service partner to industrial companies in a variety of market segments for over 90 years. The group employs around 350 people and has subsidiaries and distributors in more than 40 countries.
